

Blitz Intake — Admin Guide

How to manage the intake sheet and review the blitzes the Unbreakable team submits through the form. For internal admin and CS staff — no coding required.

[Form · unbreakable-blitz-intake.vercel.app](#)
[Backend · the intake Google Sheet](#)
[For · admin / CS staff](#)

01 How it works

1

Unbreakable submits

A manager opens the form and either creates a **new blitz** (typing a blitz name) or picks **add reps to an existing** one, adds the reps and comp, and submits.

2

It lands in the sheet

Each submission becomes one row in [Submissions](#) and one row per rep in [Rep detail](#). New reps and blitzes add themselves to the reference tabs.

3

You manage & review

Keep the reference lists current, and use [Submissions](#) and [Rep detail](#) to onboard reps and hand clean data to payroll.

02 The tabs

[Reference](#) tabs are what the form reads — edit them to change what the form offers. [Auto-filled](#) tabs are your record of what came in. [Config](#) is behind-the-scenes.

TAB	KIND	WHAT IT'S FOR
Roster	Reference	Master rep list. The form's rep picker and default comp read from here. New reps append here with a blank UNB ID for you to assign.
CompPlans	Reference	Sequifi's named rate plans (Rate 200, Rate 250...). The form's comp dropdown reads this. Add a row to add a plan.
ISPs	Reference	The ISP chips on the form. Add a row (name + abbreviation) to make a new ISP selectable.
Blitzes	Reference	The list behind "add reps to an existing blitz." New blitzes submitted on the form append here automatically.
Submissions	Auto-filled	One row per submission, each with a Submission ID. Your master log of everything that came in.
Rep detail	Auto-filled	One row per rep per blitz — built for payroll. Comp plan, comp \$, and the overrides that apply to each rep.
Config	Config	Stores the uploaded logo. Leave it alone.

03 Managing the lists

- **Editing a reference tab changes the form.** Add a rep, a comp plan, or an ISP by adding a row — no developer needed.
- **Changes appear when the form is reloaded**, not live in a tab that's already open. Tell submitters to refresh if they don't see a new option.
- **Use the `Active` column to hide, not delete.** On `CompPlans`, `ISPs`, and `Blitzes`, set `Active` to `no` to retire an item without losing its history.
- **Dedupe happens on email.** When a rep is added twice, the sheet keeps one Roster entry — keep emails accurate.
- **Don't rename header rows** or delete the `Submissions` / `Rep detail` tabs — the form writes to those exact columns.

04 Reviewing submissions

- **Start in `Submissions`.** Each row is one submission. The Submission ID looks like `UNB-20260712-001` (date + that day's sequence). The **Full summary** column is a plain-English recap.
- **A blitz marked `(+reps added)`** means reps added to an existing blitz, not a brand-new one.
- **Use `Rep detail` for payroll.** One row per rep: comp plan, comp \$, new-rep flag, and the manager/divisional overrides resolved onto their row. Filter by **Blitz** or **Submission ID**.
- **New reps to onboard** show `New rep? = yes` with a blank UNB ID — that's your onboarding queue.
- **Export anytime:** `File → Download → Microsoft Excel (.xlsx)`.

Tip: create a Filter view (not a plain filter) on `Rep detail` so you can slice by blitz or office without disturbing what teammates see.

05 Common tasks

ONBOARDING

Onboard a new rep

Find `New rep? = yes` in `Rep detail` (or a blank UNB ID in `Roster`). Create them in Sequifi, then paste their UNB ID back into the Roster row.

REFERENCE

Add a comp plan or ISP

Add a row to `CompPlans` (plan name + rate) or `ISPs` (name + abbreviation). It appears in the form on next reload.

REFERENCE

Retire an old blitz

In `Blitzes`, set that row's `Active` to `no`. It stops showing in the "add reps" picker but stays on record.

BRANDING

Change the logo

Open the form → **Upload logo** → pick the image. It saves to the sheet and shows for everyone. Use an SVG or a small PNG.

SETUP

Connect a new browser

If the form shows **Roster offline**, click **Connect / Change sheet** and paste the Web App URL ending in `/exec`.

REFERENCE

Fix a rep's comp

Edit their **Default plan** in `Roster`. That sets the form's pre-fill only — actual comp is chosen per blitz at submit time.

06 Troubleshooting

- **"Roster offline — using cache."** The form couldn't reach the sheet. Re-paste the `/exec` URL via **Connect**; if it persists, the Apps Script Web App needs access set to **Anyone** and a fresh deployment.
- **A new rep / plan / ISP isn't showing.** Reload the form — reference tabs load on open, not live.
- **Two people editing at once.** Fine. Submissions are written under a lock, so simultaneous submits won't collide.
- **A submission didn't appear.** Check the submitter had the form connected (green dot) and hit Submit — an offline form can't write.

07 Train a new admin (15 minutes)

- 1 Open the intake sheet together and walk through the tabs using section 02.
- 2 Open the form, connect it, and submit one **test blitz** with two reps (make one a brand-new rep).
- 3 Find that submission in `Submissions` — point out the Submission ID and Full summary.
- 4 Open `Rep detail` and show the two rep rows, the comp columns, and the `New rep? = yes` flag.
- 5 Confirm the new rep landed in `Roster` with a blank UNB ID; assign one.
- 6 Edit a reference row (e.g. add a comp plan), reload the form, and watch it appear.
- 7 Export `Rep detail` to Excel to show the payroll hand-off.
